

ADITYA TIWARI

QA Manual and Automation Engineer | Data Analyst | Selenium · Java · SQL · Python · Power BI
adityatiwari.at2000@gmail.com | +91 8766864054 | Mumbai | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software QA Manual and Automation Engineer with 3+ years of hands-on experience designing and executing automation frameworks for web application and API-based enterprise billing and finance systems. Proficient in Selenium WebDriver with Java and Python, BDD/Cucumber, and REST API testing using open-source tools. Experienced in CI/CD pipeline integration (Jenkins), Agile/Scrum delivery, and full Software Test Life Cycle (STLC) management. Strong analytical foundation in defect management, test coverage analysis, and cross-functional collaboration across distributed teams, supplemented by data analysis skills including SQL, Python (Pandas, NumPy), Excel, and Power BI/Tableau for data validation, reporting, and visualization.

TECHNICAL SKILLS

Automation Frameworks: Selenium WebDriver (Java), Python, Playwright, BDD/Cucumber, TestNG, Page Object Model (POM)

API Testing: REST API testing, Postman, JSON/XML validation, HTTP methods (GET/POST/PUT/DELETE)

Languages: Java, SQL, Python

CI/CD & DevOps: Jenkins, Git/GitHub, Maven

Test Management: JIRA, Agile/Scrum, STLC, Regression Testing, Functional Testing, E2E Testing.

Reporting: Extent Reports, Excel-based KPI dashboards.

Data Analysis: SQL, Python (Pandas, NumPy), Excel, Power BI, Tableau — used for data validation, trend analysis, and reporting dashboards.

AI & Productivity Tools: ChatGPT, GitHub Copilot, Prompt Engineering, AI-assisted Test Case Generation, AI-assisted Test Data Creation, AI-assisted Code Review, AI-assisted Data Analysis & Insights Generation, AI-assisted Data Cleaning & Visualization Suggestions.

PROFESSIONAL EXPERIENCE

Software QA Manual & Automation Engineer — DataDevice · Mumbai

Feb 2023 – Present

Enterprise billing and finance software — web application, API-based, React and Angular Platform

Web application and REST API-based enterprise billing & finance platform | Java · Selenium · BDD Cucumber · REST API

- Designed and developed end-to-end automation test framework for WareConnect — an enterprise-grade web and API-based billing and finance platform — using Selenium WebDriver with Java and BDD Cucumber following the Page Object Model (POM) design pattern.
- Built and maintained REST API automation test suites validating critical billing workflows including invoice generation, payment processing, and financial reconciliation using open-source tools.
- Executed and managed test cycles across Functional, Regression, E2E, and Continuous Integration phases as part of the full STLC, ensuring consistent release quality across sprint cycles.
- Authored 150+ automated test cases covering web UI and API layers of the billing and finance modules, achieving 90%+ regression coverage on critical transaction flows.
- Collaborated with developers and product teams across multiple locations and time zones to triage defects, review test coverage gaps, and align on release sign-off criteria.
- Performed root-cause analysis on 200+ defects, documenting findings in JIRA with full traceability from test case to resolution — reducing recurring production defects by 15%.
- Produced weekly test execution dashboards in Excel tracking defect density, coverage %, and test pass/fail trends, enabling data-driven release decisions across 3 product lines.

PERSONAL PROJECTS

Hybrid Test Automation Framework – Opencart E-Commerce App

Java, Selenium, TestNG, Cucumber, Docker · [GitHub](#)

- Built a hybrid automation framework (Selenium, TestNG, Cucumber) with Dockerized Selenium Grid for parallel cross-browser testing, integrated with Jenkins CI/CD, Log4j2 logging, and Extent Reports for end-to-end test execution and traceability.

FinPulse — Real-Time Market Intelligence Dashboard

Python, Pandas, NumPy, Streamlit, Plotly, REST APIs · [GitHub](#)

- Developed and deployed a real-time fintech analytics dashboard (Python, Pandas, NumPy, Streamlit) featuring technical indicators (Bollinger Bands, RSI) and correlation analysis, optimized with concurrent API calls and TTL caching to reduce API load by ~80% and eliminate UI lag.

EDUCATION

Master of Computer Applications (MCA) — Jain University, Bengaluru

2024 – 2026

CGPA: 9.30 / 10

B.Sc. Mathematics — Thakur College of Science & Commerce, Mumbai

2019 – 2022

CGPA: 7.57 / 10

CERTIFICATIONS

- Data Analytics Job Simulation — Deloitte Australia (Forage)
- Power BI for Data Analysts by Microsoft Press — [LinkedIn](#) / [Simplilearn](#)
- Career Essentials in Data Analysis — Microsoft / [LinkedIn](#)

DECLARATION

I hereby declare that all information provided in this resume is true and accurate to the best of my knowledge. I hold all required educational documents including 10th, 12th, and degree certificates from full-time institutions.
